

HOT SHOT TRAILER

Hot Shot Trailers are primarily used to transport shipments that are lower in overall weight, usually up to approximately 15,000 lbs, but that also need to travel on an open trailer in order to be side loaded, rear loaded or loaded from above. These trailers are typically pulled using a Pick Up Truck or a similar type vehicle. Deck lengths vary and are most often between 30' and 40' in length. The low profile of the deck allows for freight height of between 120" and 130" in most cases.

HOT SHOT TRAILER DIMENSIONS

Length	30' to 40'
Width	102"
Height	36" - 42"

HOT SHOT TYPICAL CARGO MAXIMUMS
