

# REMOVABLE GOOSENECK TRAILER (RGN)

A Removable Gooseneck Trailer (RGN) is utilized to transport larger shipments both legally, and through the use of permits and/or escorts. They are primarily used to transport equipment that needs to be driven on or off of the trailer. Units such as farm equipment and specialty vehicles are commonly shipped on RGNs. The removable gooseneck can be separated from the cab allowing access to the drop down ramps of the trailer to allow for the units to easily be driven on or off.
